

## Criar grupo dinâmico com base em atributo personalizado

Grupo dinâmico: É um grupo que **adiciona e remove usuários automaticamente** conforme regras definidas. ex.: departamento, cargo, localização ou até atributos personalizados.

Tens duas formas de criar um grupo dinâmico baseado em atributo personalizado no Microsoft Entra ID, pelo Portal ou via PowerShell/Graph.

### Criar pelo Portal do Entra

1. Vai em <https://entra.microsoft.com>
2. entra em **Groups** → **All groups** → **New group** Preenche:
3. Group type → Security (ou Microsoft 365)
4. Group name → exemplo: RH
5. Membership type → Dynamic User
